Summary

Backend focused developer with full stack exposure, experienced in developing API driven applications and implementing backend logic for end to end projects.

Education

Bachelor of Engineering in Computer Science & Engineering — **CGPA: 8.26**
Canara Engineering College, Bantwal — Expected 2026

Pre-University Education - PCMB — **Percentage: 93.16**
R N Shetty PU College, Kundapur — 2020-2022

Secondary School (Class 10) — **Percentage: 94.88**
Govt. High School, Basrur — 2019-2020

Technical Skills

Programming Languages: Java, C
Frameworks & Libraries: Spring Boot, React.js
Database: MySQL
Tools: Postman, IntelliJ IDEA
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems
Soft Skills: Team Collaboration, Communication, Problem-Solving, Adaptability

Projects & Experience

AagriGgate | Project Link: github.com/B-Vighnesh/AagriGgate — 2024-25
Tech Stack: Spring Boot, React.js, MySQL

- Engineered a full stack web platform enabling farmers to connect directly with buyers, reducing reliance on intermediaries.
- Architected RESTful APIs using Spring Boot backend and developed an interactive React.js frontend for a seamless user experience.
- Integrated MySQL for storage and implemented role-based access control for secure operations.

Dark Pattern Detector | Project Link: github.com/B-Vighnesh/Dark-Pattern-Detector — 2024-25
Tech Stack: Spring Boot, React.js, JavaScript, MySQL, DistillBERT

- Developed a machine learning based system to detect deceptive website patterns through a real-time browser extension.
- Integrated the ML model with a JavaScript-based browser extension for real-time dark pattern detection.
- Implemented a React.js interface integrated with a Spring Boot backend for user and feedback management.

EquiManage | Personal Project | Project Link: github.com/B-Vighnesh/EquiManage — 2023-24
Tech Stack: Java, MySQL

- Designed an equipment management system tailored for electronics labs, enhancing organization and resource tracking.
- Programmed a console-based inventory system using Java and MySQL, improving equipment tracking accuracy and reducing manual logging time.
- Wrote clean, maintainable code and implemented JDBC for efficient database communication.

Certifications & Achievements

- **Programming in Java** – IIT Kharagpur (NPTEL, 2025)
- **Java Programming: Arrays, Lists, and Structured Data** – Duke University (Coursera, 2024)
- **Introduction to Databases** – Meta (Coursera, 2024)
- **DPB Hackathon** – Participant, IIT (BHU), Varanasi (DPBH, 2023)
